1. IDENTIFICATION

Product Name: Biff Ant
Other Names: Environmentally Hazardous Substance, Liquid, NOS (contains bifenthrin)
Recommended Use: Insecticide
Distributor: Key Industries Ltd
Address: PO Box 65 070 Mairangi Bay, Auckland 0754
Telephone: 09 917 1791
Emergency Phone: 027 4941659
National Poisons Centre: 0800 764 766

2. HAZARDS IDENTIFICATION

Hazard Classification: 6.1D, 6.3B, 6.5B, 8.3A, 6.9B, 9.1A, 9.2C, 9.3B, 9.4A
Hazards:
- Harmful if swallowed.
- Causes mild skin irritation.
- May cause an allergic skin reaction.
- Causes serious eye damage.
- May cause damage to organs.
- Very toxic to aquatic life with long lasting effects.
- Harmful to the soil environment.
- Toxic to terrestrial vertebrates.
- Very toxic to terrestrial invertebrates.

3. COMPOSITION: Information on Ingredients

4. FIRST AID MEASURES

Consult the National Poisons Information Centre 0800 POISON (0800 764 766) or a doctor in every case of suspected chemical poisoning. Never give fluids or induce vomiting if a patient is unconscious or convulsing regardless of cause of injury. If breathing difficulties occur seek medical attention immediately.

Swallowed
If swallowed, do not induce vomiting. If conscious and alert, rinse mouth and drink 1-2 cupfuls of water. Begin artificial respiration if the victim is not breathing. Use mouth to nose rather than mouth to mouth. Obtain medical attention.

Skin Contact
Immediately wash with plenty of soap and water. Remove contaminated clothing and shoes. Wash clothing before reuse. Destroy contaminated shoes and other contaminated leather articles such as belts and watchbands. Seek medical attention if irritation occurs.

Eye Contact
Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Remove contact lenses if present and easy to do and continue rinsing. Do NOT allow victim to rub eyes or keep eyes closed. Obtain urgent medical attention.

Inhalation
Move the victim to fresh air immediately. Begin artificial respiration if breathing has stopped. Obtain medical attention immediately.
Safety Data Sheet: Biff Ant

First Aid facilities
Provide eye baths and safety showers close to areas where exposure may occur.

Medical Attention
Treat symptomatically and supportively, monitoring the development of hypersensitivity reactions with respiratory distress. Gastric lavage may be indicated if ingested. No known antidote. Do not confuse with cholinesterase poisoning. Paraesthesia from skin contact, while less likely with this pyrethroid can be partially alleviated by the application of a vitamin E containing moisturising cream. In all cases consult the National Poisons Centre for the most up to date treatment information.

5. FIRE FIGHTING MEASURES
Shut off product that may ‘fuel’ a fire if safe to do so. Allow trained personnel to attend a fire in progress, providing fire fighters with this Safety Data Sheet. Prevent extinguishing media from escaping to drains and waterways.

Suitable extinguishing media
Water fog, fine spray, alcohol resistant foam, dry chemical powder or carbon dioxide. Do not use water stream directly as this may spread fire or give a violent steam eruption. Cool fire exposed container with water spray.

Hazards from combustion products
Decomposition from combustion will emit acrid smoke and toxic fumes containing carbon oxides, hydrogen chloride (Cl) and hydrogen fluoride (F). 

Precautions for fire fighters and special protective equipment
Full protective clothing with chemical goggles, butyl or neoprene gloves and self-contained breathing apparatus

6. ACCIDENTAL RELEASE MEASURES
Emergency Procedures
Prevent product from escaping to drains and waterways. Contain leaking packaging in a containment vessel or bunded area. Prevent any vapours or dust from building up in confined areas. Ensure that drain valves are closed at all times. Clean up minor spills immediately.

Methods and materials for containment for a major spill
Eliminate sources of ignition. Warn occupants of downwind areas of possible hazards. Keep the public away from the area. Prevent product from entering sewers, watercourses, or low-lying areas. Shut off the source of the spill if safe to do so. Advise relevant authorities if substance has entered a watercourse or sewer or has contaminated soil or vegetation. Take measures to minimise the effect on the groundwater. If possible recover product using a pump paying attention to flammability hazards or absorbent material. Collect and seal in properly labelled containers for disposal. Consult an expert on disposal of recovered material and ensure conformity to local disposal regulations. In all instances due consideration must be given for First Aid Measures (Section 4), PPE requirements (Section 8), Stability and Reactivity (Section 10) for this material.

7. HANDLING AND STORAGE
Precautions for safe handling
Keep out of reach of children. This product is combustible. Avoid sources of ignition including smoking. Keep containers closed. Use only in well-ventillated areas. When handling do not eat, drink or smoke. Wash hands thoroughly after handling. Wash clothing separately before reuse.

Conditions for safe storage
Store in a cool, dry place away from direct sunlight. Keep away from heat and ignition sources. Store in original containers. Protect from physical damage to prevent accidental release. Do not store with food, feedstuffs, fertilizers and seeds.

Incompatible materials
None known.
Safety Data Sheet: Biff Ant

8. EXPOSURE CONTROLS: Personal Protection

Exposure Limits
A WES has been set by MBIE for three materials in this product, propane-1,2 diol (propylene glycol), kaolin and cellulose. The WES for propylene glycol is TWA (vapour and particulates) 150ppm or 474 mg/m³. TWA (particulates only) 10 mg/m³. The TWA for cellulose is 10 mg/m³, and for Kaolin is 10mg/m³ inhalable dust; 2mg/m³ respirable dust.

Engineering Controls:
The use of local exhaust ventilation is recommended to control process emissions near the source. Sufficient ventilation should be provided to keep the solvent in air concentrations below any relevant exposure limit. Provide mechanical ventilation of confined spaces. Explosion proof electrical equipment recommended but not required based on the flashpoint of this material.

Hygiene Controls:
Facilities storing or utilising this material should be equipped with an eyewash facility, safety shower and facility for washing hands/face after work.

Personal Protective Equipment
Respiratory Protection: An approved half/full face filter respirator for organic vapours and particulates/spray droplets should be worn when applying this product.
Eye protection: Always use safety glasses or a chemical goggles when handling this product. Contact lenses may absorb and concentrate irritants, glasses are recommended.
Skin/ Body Protection: Always wear long sleeves and long trousers or coveralls, and enclosed footwear of safety boots when handling this product. It is recommended that chemical resistant gloves (eg nitrile, neoprene) be worn when handling this product.

9. PHYSICAL AND CHEMICAL PROPERTIES

The values listed are indicative of this product’s physical and chemical properties. For a full product specification, please consult Key Industries.

10. STABILITY AND REACTIVITY

Chemical stability
Stable at room temperature and pressure. Separates at elevated temperatures but recombines at ambient temperature

Hazardous decomposition products
Decomposition from combustion will emit acrid smoke and toxic fumes containing carbon oxides, hydrogen chloride and hydrogen fluoride.

Specific Materials to Avoid
Strong acids, alkalis, oxidising agents, reducing agents and heat.

Hazardous Polymerisation
Not known to occur.
11. **TOXICOLOGICAL INFORMATION**

**Acute Effects**

**Ingestion:** Moderate toxicity if swallowed. Symptoms include burning sensations in the mouth, headache, dizziness, drowsiness, diarrhoea, nausea, vomiting, listlessness, stomach pain, muscular twitching or arms or legs. Swallowing large quantities can result in confusion, convulsions, coma, seizures and death. Contact a doctor immediately.

**Eye Contact:** The liquid may be irritating and/or corrosive to the eyes and may result in corneal injury. Avoid eye contact.

**Skin Contact:** Mildly irritating and may cause an allergic skin reaction in susceptible persons. Contact with the skin, especially the face, may result in initial stinging or burning sensations (parasthesia) followed by numbing which may persist for up to 24 hours in highly susceptible persons. Avoid skin contact.

**Inhalation:** The vapour/mist is discomforting to the upper respiratory tract and lungs. Acute effects from inhalation of high vapour concentrations may cause effects similar to that of ingestion.

**Chronic Effects**

Prolonged or repeated exposure may result in central nervous system effects such as tremors, uncoordination and disorientation. Prolonged or repeated skin contact may result in an allergic reaction. Persons with pre-existing conditions are advised to limit or avoid product contact.

**Other Health Effects Information**

Not Available.

**Toxicological Information**

12. **ECOLOGICAL INFORMATION**

**Ecotoxicity**

This product is highly toxic to the environment, with the potential to result in irreparable and irreversible effects. See hazard classifications in section 15 of this document. No specific ecological data available on this product.

**Persistence/ Biodegradability:** log P: 6.0 (bifenthrin). This substance is regarded as bioaccumulative and persistent by the EPA.

**Mobility:** This product is not readily soluble with water limiting its mobility in the environment. This product is likely to have low mobility in the environment and low leaching potential

**Environmental Toxicity:**

Fish toxicity LC<sub>50</sub>: 0.00015 mg/L; bifenthrin active ingredient
Crustacean EC<sub>50</sub>: 0.00007 mg/L; bifenthrin active ingredient
Honeybee: 0.0146 µg/bee; bifenthrin active ingredient

13. **DISPOSAL CONSIDERATIONS**

**Product Disposal**

Dispose of product only by using according to label or using an approved waste disposal contractor. If this material as supplied becomes a waste care should be taken to ensure compliance with national and local authorities. It is the responsibility of the waste generator to determine the toxicity and physical properties of the waste generated to determine the proper waste identification and disposal methods in compliance with applicable regulations. Do not dispose of via municipal sewers, drains, natural streams or rivers

**Packaging Disposal**

Triple rinse container and add rinsate to the spray tank. Empty packaging should be taken for recycling, recovery or disposal through a suitably qualified or licensed contractor. Care should be taken to ensure compliance with national and local authorities. Packaging may still contain product residue that may be harmful. Incinerate via approved incinerators or crush and bury in an approved landfill. Ensure that empty packaging is managed in accordance with Dangerous Goods and HSNO regulations.
14. TRANSPORT INFORMATION

UN No: UN3082  
Proper Shipping Name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, LIQUID, NOS (contains bifenthrin)  
DG Class: 9  
Packing Group: III  
Hazchem Code: 3Z

Dangerous Goods Segregation

15. REGULATORY INFORMATION

Country/Region: New Zealand

ACVM Approval: N/A

HSNO Approval: HSR100534

HSNO Classifications: 6.1D Acute Toxicity (Oral); 6.1D; 6.3B Skin Irritant; 6.5B Skin Sensitiser; 8.3A (Eye Corrosive); 6.9B Target Organ Toxicant; 9.1A Aquatic Ecotoxicant; 9.2C Soil Toxicant; 9.3B Ecotoxicant: Terrestrial Vertebrate; 9.4A Ecotoxicant Terrestrial Invertebrate

HSNO Controls: Trigger Quantities for this Material:
- Location/Transit Depot Certificate: Not required
- Hazardous Atmosphere Zone: Not required
- Signage: 100 L
- Emergency Plan, Secondary Containment: 100L
- Tracking: Not required

The trigger quantities above must take into account any other hazardous substance that is present at that location. This represents a partial list of the controls for this material. Contact Key Industries Ltd a full list of HSNO controls.

16. OTHER INFORMATION

Reasons for Issue:
Removed Approved Handler controls. Added 6.5B classification and associated statements.

Abbreviations:
TWA - the highest allowable exposure concentration in an eight-hour day for a five-day working week
STEL - maximum allowable exposure concentration at any time
CAS Number: Chemical Abstracts Number
EPA - Environmental Protection Agency of New Zealand
MBIE - Ministry of Business, Innovation and Employment
HSNO: Hazardous Substances and New Organisms
